

Martin Kronbichler — Curriculum Vitae

Personal data

Name	Martin Kronbichler
Date of birth	October 9, 1983
Nationality	Italian
Languages	German, English, Italian, Swedish
Family	Married, one child (born 2011)

Appointments

11/2012–	Post-doctoral researcher (Wissenschaftlicher Mitarbeiter) with Wolfgang A. Wall, Institute for Computational Mechanics, Technische Universität München
07/2012–	Part-time parental leave (approx. 17%)
02/2012–10/2012	Software developer, group for numerical algorithms, Comsol AB, Stockholm
05/2007–01/2012	Scholar of Graduate School in Mathematics and Computation (FMB) at Uppsala University, including about 15% teaching

Academic degrees

2012	Ph.D. in Scientific Computing with Specialization in Numerical Analysis at Uppsala University, advisors: Gunilla Kreiss, Per Lötstedt. Thesis title: “Computational Techniques for Coupled Flow-Transport Problems”
2007	Diploma in engineering mathematics (Technomathematik), minor subjects mechanical engineering and physics, Technische Universität München.

Garching b. München, June 22, 2017

Scientific achievements

Peer-reviewed journal papers

Conference talks

- *ISC High Performance 2017*, Frankfurt, June 20, 2017: “Fast Matrix-Free Discontinuous Galerkin Kernels on Modern Computer Architectures”.
- *19th International Conference on Finite Elements in Flow Problems – FEF 2017*, Rome, April 6, 2017: “A high-order discontinuous Galerkin solver for turbulent incompressible turbulent flow with matrix-free implementation”.
- *SPPEXA Annual Meeting 2017*, Garching, March 20, 2017: “ExaDG: High-order discontinuous Galerkin for the exa-scale”.
- *ECCOMAS Congress 2016*, Crete Island, June 10, 2016: “A high-performance discontinuous Galerkin solver for the simulation of incompressible turbulent flow”.
- *Higher-order DG methods and finite element software for modern architectures*, Bath, May 31, 2016: Invited talk on “Fast matrix-free methods via generic finite element programming”.
- *5th European Trilinos User Group Meeting (EuroTUG 2016)*, Garching, April 20, 2016: “Tuning a large multiphysics code for performance and limitations of the legacy Epetra stack”.
- *SPPEXA Annual Meeting 2016*, Garching, January 27, 2016: Talk on “ExaDG: High-order discontinuous Galerkin for the exa-scale”.
- *Simula workshop on dynamic adaptivity*, Simula Research Laboratory, Oslo, December 9, 2015: Invited talk on “High-performance implementation of adaptive finite elements with matrix-free multigrid methods”.

- *Jahrestagung der Deutschen Mathematiker-Vereinigung 2015*, Hamburg, September 25, 2015: “Hybridizable discontinuous Galerkin methods for incompressible flow”.
- *Platform for Advanced Scientific Computing Conference PASC15*, Zürich, June 2, 2015: “Shared memory parallelization strategies for matrix-free finite element operator evaluation”.
- *3rd German Japan Workshop on Computational Mechanics*, Garching, March 30, 2015: “Hybridized Discontinuous Galerkin methods for large eddy simulation of turbulent flow”.
- *International SPPEXA Workshop: Numerical Methods for High-Performance Computers*, Heidelberg, December 2, 2014: Invited talk on “Fast matrix-free methods for adaptive higher order elements”.
- *11th World Congress on Computational Mechanics*, Barcelona, July 23, 2014: “Hybridized discontinuous Galerkin methods for large eddy simulation of turbulent flow”.
- *42nd SPEEDUP Workshop on High-Performance Computing*, Paul-Scherrer-Institut / ETH Zürich, August 29, 2013: Invited talk on “ASPECT: An advanced mantle convection solver based modern numerical software”.
- *deal.II workshop*, Texas A&M University, College Station, August 20, 2013: Invited talk on “Efficient matrix-free methods in deal.II”.
- *7th International Conference on e-Science*, Stockholm, December 8, 2011: Talk on “Parallel Finite Element Operation Application: Graph Partitioning and Coloring”.
- *ENUMATH 2011*, Leicester, September 8, 2011: Talk on “Multiscale modeling of contact line dynamics”.
- *ENUMATH 2011*, Leicester, September 6, 2011: Talk on “Strictly stable high order finite differences for variable coefficient convection–diffusion equations”.
- *deal.II workshop*, Heidelberg, August 24, 2010: Talk on “Generic and efficient solvers for coupled flow/transport problems”.
- *V European Conference on Computational Fluid Dynamics (Eccomas)*, Lisbon, June 14, 2010: Talk on “A Hybrid Level-Set-Cahn-Hilliard model for Two-Phase Flow”.
- *ENUMATH 2009*, Uppsala, July 2, 2009: Talk on “A conservative level set method with Cahn-Hilliard contact line dynamics”.
- *1st European Conference on Microfluidics*, Bologna, December 11, 2008: Poster on “A hybrid level-set-Cahn-Hilliard model for two-phase flow”.
- *BIT Numerical Circus*, Oslo, August 28, 2008: Talk on “A hybrid level-set-Cahn-Hilliard model for two-phase flow”.

Awards

- “Extreme Scaling Award – Finalist” for excellent strong scaling of our code INDEXA to 147,456 cores of SuperMUC
